OUR MODULES

The smooth functioning of Library Management Software is facilitated by these modules.

Circulation

It is a central and highly visible function of library, as it keeps the record of status of books in the library.

OPAC

Online Public Access Catalog, it is an online database of materials kept in the library. It allows the search for an item of our choice in the library.

Acquisition

It the department in the library which is responsible for the selection and purchase of material or resources in the library.

Cataloguing

It is the process of creating a list of all bibliographic items such as short description, list of subjects, author name and the classification.

Membership Module

This module keep track of all important information of student, who has taken membership of library.

Report Generator

It helps in generating various reports like status of issued books, total members, books returned etc.
